- C

Detailed Action

Cross-Referencing

1. There is no cross-reference in the specification regarding the instant Reissue application being a Reissue of U.S. Patent No. 5,764,313.

Certificate of Correction

2. Before, Allowance, a Certificate of Correction is necessary to make reference of 09/443,251 in the U.S. Patent 5,764,313.

Surrender of Original Patent

- Applicant is required to surrender the original patent as required by 35 U.S.C.
 (or) submit an affidavit/declaration averring that the original patent is lost or misplaced.
- 37 CFR 1.178. Original patent; continuing duty of applicant.
- (a) The application for a reissue should be accompanied by either an offer to surrender the original patent, or the original patent itself, or if the original is lost or inaccessible, by a statement to that effect. The application may be accepted for examination in the absence of the original patent or the statement, but one or the other must be supplied before the application is allowed. If a reissue application is refused, the original patent, if surrendered, will be returned to applicant upon request.

Application/Control Number: 09/443,251 Page 3

Art Unit: 2626

The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

New Matter

4. Applicant is advised that new matter, that is, matter not present in the patent sought for Reissue, is excluded from a Reissue application in accordance with 35 U.S.C. 251.

35 U.S.C. 251. (Reissue of defective patents.)

Whenever any patent is, through error without any deceptive intention, deemed wholly or partly inoperative or invalid, by reason of a defective specification or drawing, or by reason of the patentee claiming more or less then he had a right to claim in the patent, the Director shall, on the surrender of such patent and the payment of the fee required by law, reissue the patent for the invention disclosed in the original patent, and in accordance with a new and amended application, for the un-expired part of the term of the original patent. No new matter shall be introduced into the application for reissue.

5. Claims 6-10 are rejected under 35 U.S.C. Sect. 251 for introducing and containing new matter in the Reissue application.

The new matter includes "A monitor provided with a cabinet..."

The Background of the Invention states:

"The invention relates to a TV receiver set provided with a cabinet, a picture tube, and fastening means for fastening the picture tube in the cabinet, a fastening hook of the picture tube, and a bracket which is fastened between the support and the hook."

Application/Control Number: 09/443,251

Art Unit: 2626

There is clearly no mention of a "monitor provided with a cabinet".

Moreover, the Field of the Invention states:

"Such a TV receiver set is know from GB-A-1,122,178. Clearly, the field of the invention was directed toward a TV receiver an not a monitor. There is no mention in the Field of the Invention of a monitor.

The specification is deficient with respect to a monitor. The specification does not anticipate or suggest the use of the invention with a monitor.

The original claims also do not suggest the use of the invention with a monitor.

It is well known that some monitors today do not use CRTs, i.e., liquid crystal display monitors don't use a CRT. Hence, applicant does not have enabling disclosure for the invention to be directed to both a CRT and computer monitor.

Defective Reissue Declaration

6. Claims 6-10 are rejected as being based upon a defective Reissue Declaration under 35 U.S.C. Sect. 251 as set forth below. See 37 C.F.R. 1.175.

The nature of the defect is as follows: The specification of the original patent is directed toward a CRT in a television receiver. Applicant alleges that an error was made in that the claims should also be directed to a computer monitor. First, there is no error, in that the original claims were correctly directed toward a television receiver since that is all that the specification was directed toward. The applicant now, erroneously directs the claims in the Reissue application to subject matter not covered in the original specification. Second, even if applicant did have original support for a computer monitor, a computer monitor is not claimed in the Reissue claims.

Application/Control Number: 09/443,251

Art Unit: 2626

Double Patenting

7. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 6-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 5,764,313. Although the conflicting claims are not identical, they are not patentably distinct from each other for the reason set forth below. The original claims are directed toward mounting a CRT in a television receiver cabinet. By applicant's own admission in the Declaration of the Reissue, he states in part:

"... since a computer monitor is, in essence, a television receiver..", applicant insinuates the two devices are the same.
